

Buckingham Equine Vets AI Packages 2019

For the 2019 breeding season we have produced a highly competitive package for both chilled and frozen artificial insemination (AI)

Buckingham Equine Vets is a BEVA listed practice experienced in the use of AI. Please see our website for more details on the processes involved in AI and the difference between chilled and frozen AI:

www.buckinghamequinevets.com/artificial-insemination/

Below is listed what is and is not included in our AI packages. Please read the details through carefully so that you can decide which package is best suited to you needs.

If you have any questions after reading the details please call our repro vet, **Andrew Wallace**, at the clinic on **01908 560789**. We look forward to hearing from you.

AI at the Clinic

What the package includes:

- All reproductive scanning immediately before and during the cycle
- Insemination
- Fertility drugs: 1 dose of Estrumate to shorten the reproductive cycle, 1 dose of Chorulon to induce ovulation
- Microscopic evaluation of semen to assess quality of the sample (not available on yards)
- One post insemination lavage of the uterus to reduce fluid accumulation (One 1l bag Hartmans and flushing tube) if required
- Pregnancy scans at days: 14, 28
- Full stabled livery for 4 days & nights

AI at yards

What the package includes:

- As above for AI at the clinic but excluding livery
- Additional visit charges to yards within the area covered by the Practice. These charges are competitively priced at **75%** of our normal routine visit fee (NB: Our free visit offer for routine work does not apply). Please contact us for further details of visit costs to a specific area.

Owner's responsibilities

- Purchase and organise delivery of the semen
- Semen collection cost from the stallion
- Insurance of your horse for vets fees and third party damage while at the clinic. Please note some insurance companies do not insure horses while they are at livery.
- Insurance of semen stored at the clinic. Semen is stored at the clinic at the owner's risk.

What the packages don't include:

- Visit charges for scanning on yards. Our Free Visits charges are not applicable to reproductive packages during the week of insemination. Please phone us to discuss visit charges to your area.
- Sedation of the mare.
- Additional drugs/fluids for treating endometritis: antibiotics, oxytocin, additional bags of fluids for flushing uterus.
- Management and reduction of twin pregnancy
- Caslick procedure (suturing of the vulva) should this be beneficial to reduce uterine infection
- Laboratory fees (CEM, EVA, EIA, uterine swabs to investigate infertility).
- Livery beyond 4 days. Additional livery charges are £18.90 per day.
- Examinations and scans beyond day 30 of pregnancy
- Assistance in foaling
- Post foaling checks
- Medical problems unrelated to the reproductive tract.
- For mares with a history of uterine infection, returning for a second cycle, or showing fluid in their uterus prior to insemination we advise a swab and bacterial culture of the uterus so that suitable therapy can be performed prior to insemination. All these therapies are not included in the package.

Points to note before commencing AI:

- There is no guarantee that a mare will get into foal. It should be noted that the chances of a mare becoming pregnant reduced as in get old from the age of 11 years onwards. Furthermore the chance of a mare conceiving under frozen AI is worse than that for chilled AI (or natural service). Please bear this in mind when choosing a package.
- In order to highlight our confidence in a successful outcome we don't charge a standard fee for a positive or negative pregnancy. Instead there is an additional charge, an '**in foal fee**', only if the mare is conformed in foal at day 28 after insemination. If the mare is not in foal, no 'in foal fee' is charged.
- Payment for insemination and our 'in-foal fee' is required within our terms of business, i.e within 2 weeks of invoice for the work performed.
- Mares should be admitted on a Thursday or Friday to our clinic. This enables us to manipulate her reproductive cycle so that she is due to be inseminated later the following week when semen is available and to avoid the weekend when semen delivery can be problematic.

Charges

All prices include VAT (NB: Many veterinary practices do not include VAT when quoting their prices). All prices are per cycle. Payment: We require payment for the cost of each insemination prior to commencing each cycle (including livery or visit charges). The 'in foal fee' is due within 14 days of the positive 28 day scan. Additional charges e.g. for sedation, or treatment for endometritis may occur.

Chilled AI at the clinic - £375, plus in-foal fee £100 (NB includes 4 days full livery)

Chilled AI on yard - £275, plus in foal fee £100 (NB additional visit charges - average visit costs: £100-£150)

Frozen AI at the clinic - £475, plus in foal fee £100 (NB includes 4 days full livery)

Frozen AI on yard – Not available

**PLEASE NOTE: WE REQUEST THAT PAYMENTS FOR THE INITIAL CHARGES ARE MADE
PRIOR TO COMMENCING REPRODUCTIVE WORK**
